### Wine description and information

The grape variety of the Merlot is known and cultivated internationally. In our winery its whole vinification takes place in wooden barrels and is carried out in three fundamental steps: the maceration of the grapes, the malolactic fermentation and the final aging. After months of wait, the wine that we obtain has deep cherry colour and an intense aroma of spices and fruits. In the mouth, it offers a good tannic structure, followed by a long finish.

### Pairings

This wine of character is a perfect partner for stewed or grilled meat with vegetables like rocket, or a degustation of seasoned cheeses. Its ideal service temperature is 18°.
